NIGHT SCIENCE · ARGENTINA CHAPTER
EVENT REPORT

Night Science arrives in *Argentina*

First edition in Argentina · Universidad Católica Argentina · Tuesday, September 29, 2026 · Online (Zoom)

On September 29, 2026, Night Science held its first workshop in Argentina, for engineering students of the Universidad Católica Argentina (UCA). Educators and working professionals also took part.

It was an **introduction** to Night Science that covered **one chapter: "A hypothesis is a liability"**, with a focus on giving students tools to unlock their projects when they feel stuck.

It was led by Romina Yalovetzky, certified by the Night Science Institute, and Mg. Elizabeth Kogan, who both joined over Zoom.

~30
connected (estimate during the session); **55 registered**

13
feedback forms, about 43% of those connected

4.3 / 5
average rating

10 of 13
asked to receive Night Science LATAM updates

The number connected is an estimate made during the session; the exact count is not available. The feedback form was voluntary, so the figures describe respondents only.

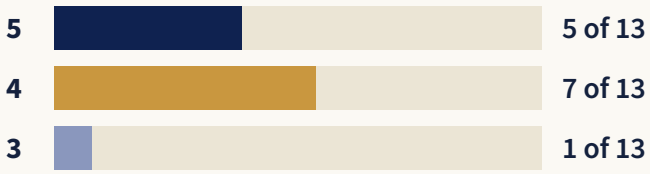

WHO GAVE US FEEDBACK

7 students, aged 18 to 24; four in Informatics Engineering, three did not state their field.

2 educators, interested in applying the approach to their teaching and supervision.

4 working professionals, aged 23 to 43.

OVERALL RATING (1 TO 5)

WORKSHOP LEADERS

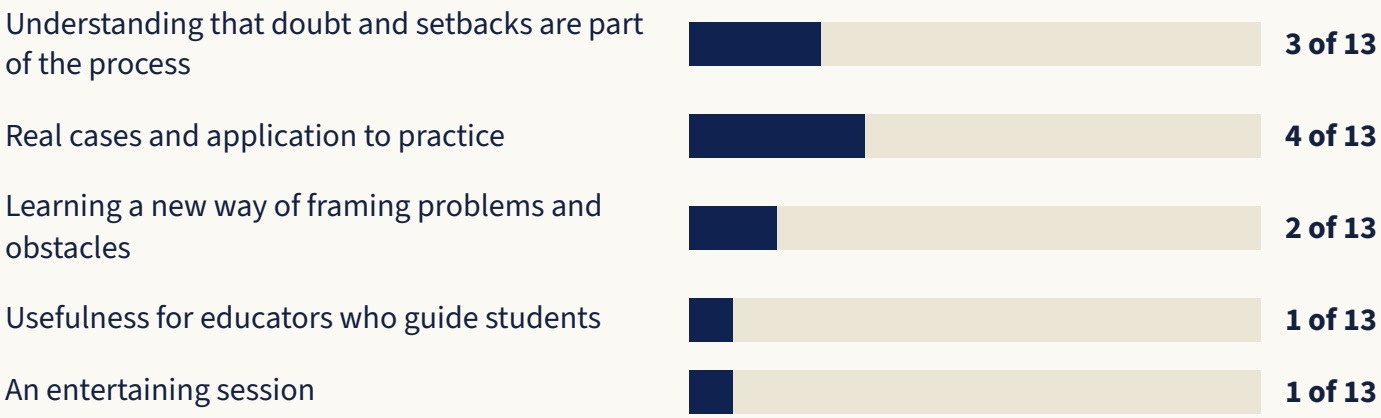

Romina Yalovetzky
Physicist, UBA
Certified by the Night Science Institute

Mg. Elizabeth Kogan
Master in Education Administration · UTDT

What participants took away

WHAT THEY VALUED MOST

Number of responses, out of 13, that mention each theme.

Each of the 13 open-ended answers is assigned to its main theme; the grouping is ours. Two responses contained no comment.

IN THEIR WORDS

> *"The way it was explained how a hypothesis can bias us about progress, seeing only the end and not the stumbles."*
>
> Student

> *"Understanding that the research process should be enjoyed, and that we must accept doubts, let a hypothesis fail and step back."*
>
> Student

> *"I liked the real-case examples and that it connects with my field of study."*
>
> Informatics Engineering student

> *"Learning the current state of this approach to research methodology, for eventual thesis-advising work."*
>
> Educator
